

## Return to the future

It has been a week since I fell into the future and met tar and still nobody believes me about what happened. Not even my friend Poe believes me and Chef mom thinks I am crazy because I told her . In fact everybody thinks i am CRAZY !! but forget about that now i'll talk about what i really want to talk about so let's get into it. I've been checking in on tar, my friend who is a really big gamer, by using the pendant he gave me when I transported back. I ask him about how the future works, what is different, and what has changed. Since we escaped from the police, I am also worried that he is being followed by the police but i am getting very suspicious because every time i talk to tar he barely has any time to talk or he just never responds and last night i heard some broadcast from the pendant that Tar gave me, when we were escaping, saying this:help I need help i'm getting chased by someone who's after me please send help NOW!!!!cczczczzczczczczczczczc. Then there was nothing but static. which is why i am going back to the future to find out what is happening.

it was midnight. I woke up. Then I got out through the back door and started the portal using the pendant. I sprinted through it. I arrived at the colorful and dark world of the future. I was in the noisy, colorful, and sketchy downtown San Diego. I rented a speeder and drove to a shack two miles away from Tar's house that he built for me about a week ago. The house had everything I needed. There were a lot of weapons and many other supplies I might need. So I grabbed a ray gun and a jetpack along with my probe, which is a small robot used by spies and detectives. so then I got everything I needed then I flew to the house with my jetpack, rang the doorbell then a camera came down then pricked me on my thumb then said : dunes family dna not recognized must terminate.

Then a machine gun came out from under it then started shooting and throwing grenades at me. Luckily i made a shield with the pendant then i broke the camera with my ray gun then sent a robotic probe. so i could see what was in there at first it wasn't much until my probe got to the living room. where i found a whole map of the town and different maps of other towns then my probe got to the kitchen. Then I saw 5 people at a table.through the probe then one of them said: we have all of them in this town so we move on to the next said another . they looked at me and then I had my probe get out of there. i don't know what's going on but i am going to find out.

## The end
