

Gran Turismo 5

By Jacob Rohrabacher

It was a bright sunny day and I was getting ready for practice before a big championship race by fixing up my car and getting it ready. I was feeling very confident because I had a good Pit Stop crew and because I know my car really well. I have been racing in this car for a couple years. During practice, I was driving my car around the course and getting it ready. My car broke down right near the last lap of Practice. My Pit Stop crew fixed my car right before the race started. So, I got to be in the race just in time before the signal light went green and I flew down that track. It was the second lap and I was in third place out of 16 other *racers*. At the last second of the third lap I came in first place and won the championship race! I got the trophy and I went home and celebrated and celebrated and celebrated and celebrated, it was so much fun! I threw a crazy big party about my victory and my family and my friends came. The trophy was there and we had Slurpees and ice cream. The trophy was big, gold and it was very shiny. My whole family had a trophy case for themselves and I put my trophy on my trophy case and it almost took up the whole thing! We had cake and cupcakes at the party that were very, very delicious. We had the party at a go kart track. All the people invited to the party got free passes for the whole year to go on the go karts.
