

The Magical Island

By Sam

One day, Big Boy came to a magical island. The Magical Island is made of ice cream and rainbows and magical animals. There is buried treasure all around the island and inside the treasure are chocolate gold coins. The reason why there is treasure chests around the island is that pirates hunt for them. Some of the pirates are good and some of the pirates are bad.

Big Boy is 23 years old and his 6 foot 5 inches tall. He is also a pirate. The pirates are all in a war. Big Boy's pirate crew is fighting Timmy's pirate crew. Whoever wins the war gets to keep the Magical Island forever until other people come to challenge them.

Big Boy's pirate crew are all of his friends. They were fighting Timmy's pirate crew for two years. Timmy's crew kept coming back after they lost but then Timmy's crew got tired of losing so they joined Big Boy's pirate crew. And then they became best friends forever and they joined forces and fought others that wanted to take over the Island.

After four years they gave up and they let other people take over the island so they stuck their swords in the ground and left.
